RE: Start-up and testing of AQD #76 and #79

Dear Tony:

The purpose of this letter is to advise you that the start-up and testing of AQD #76 (Primary Crusher), and #79 (Ore Transfer) are scheduled for the week of June 25, 2000. These baghouse sources were permitted under CT-1347, issued February 6, 1998.

EPA Methods 1-5 and 202 (without deviation) will be conducted on AQD #76. The back half inorganic condensibles of Method 202 will be added to the front half of Method 5 to determine particulate emissions. Results of the testing will be utilized to show compliance with both the 2.45 pph and the 7% opacity limits.

A one-hour run of EPA Method 9 will be conducted on AQD #79. Results of the testing will be utilized to show compliance with both the 0.84 pph and 7% opacity limits.

If you have any questions, please contact me at (307) 872-6571.

Sincerely,

Dolly A. Potter

Environmental Services Supervisor
